

CASE STUDY

MaxorPlus will become VytOne
on January 1, 2026.

Connected PBM Solution Helps School Districts Save Nearly \$4.5M and Improve Member Experience

Challenge

A large consortium serving educators in more than 85 school districts needed a new way to manage specialty spend. This group, with 13,000 lives, was looking to make quality care more affordable, provide care management for members who take specialty medicines, and make access to those medications easier. Simplifying the member experience and making care affordable was at the forefront. In the field of education, every dollar must be used wisely, and this organization was on board to save money and remove roadblocks for their members.

Simplify

Member experience and offer more affordable care

Solution

- MaxorPlus' flexible approach to partnering with our approved external vendors helped our team create a connected, multi-vendor solution to help the group get the best savings with the highest level member support.
- This solution was a three-fold offering that connected the Maxor Copay Solution product with vendor solutions such as a patient assistance program and an enhanced care management program.

Create

A MaxorPlus and multi-vendor solution

Results

With this new solution, the consortium gained these benefits:

- Affordable and accessible specialty medications.
- Close monitoring and support for those taking specialty medications.
- Adherence support.
- Education on medication use.
- Improved outcomes.

Nearly

\$4.5M

Saved in 2024*

**Savings will vary based on group demographics and programs used.*
